About the project:

About the Yellow Sea Ecoregion Planning Programme: The Yellow Sea Ecoregion Planning Programme is an international partnership between WWF, KORDI (Korea Ocean Research & Development Institute), and KEI (Korea Environment Institute) for conservation of biodiversity of the Yellow Sea Ecoregion. The ultimate goal of the Yellow Sea Ecoregion Planning Programme is to achieve conservation and sustainable uses of biodiversity and ecological processes of the Yellow Sea Ecoregion for human welfare and sustainable development of people at local, national and international levels. The programme started in 2002 and ended in 2007.

About this publication:

This report on the Biological Assessment Report of the Yellow Sea Ecoregion is one of the two major scientific outputs from the Yellow Sea Ecoregion Planning Programme. The other report is "Priority Area Analysis Report of the Yellow Sea Ecoregion - potential priority areas for long-term conservation planning of the Yellow Sea Ecoregion.
