

Ecological responsibility rating among wood enterprises of the Russian Far East

WWF Russia, Amur Branch has carried out an assessment of forest management of timber producers in the Russian Far East for the purpose of further development of sustainable forest management in the Amur Ecoregion.

Authors

- WWF Russia, Amur Branch
- Administration of the Primorie Territory
- Moscow State Forest University

With the support of

- Wood enterprises and wood exporters association of the Khabarovsk Territory
- Khabarovsk centre of forest certification
- SGS - Certification company (in Khabarovsk)
- Russia FTN - Association of Environmentally Responsible Producers of Forest Products

Goals

- Determination of ecologically responsible, socially oriented and economically stable wood enterprises
- Determination of wood enterprises which are ready to get international forest certification

Criteria

- Ecological responsibility
- Social orientation
- Economic stability

These criteria have been made on the basis of “Principles and criteria” and standards of The Forest Stewardship Council (FSC).

Steps

- Questionnaire survey (90 questions)
- Field control
- Making out of the ecological responsibility rating

Results:

- 43 companies took part in the rating (7,5 million ha – 50 % of forests in lease)
- 56 companies did not agree to take part in the rating
- totally 99 companies

Ecological responsibility rating among wood enterprises of the Russian Far East

| Place | Company |
|-------------------|---|
| High-level | |
| 1 | "Terneyles" JSC  FTN Russia |

| Middle level | | |
|---------------------------|-------------------------------------|--|
| 2 | "Melnichnoe" JSC | |
| 3 | "SHelehovskij KLPH" CJSC | |
| 4 | "Sredneamgun'skij LPH" LLC | VLTP  |
| 5 | "Primorskiy GOK" JSC | FTN Russia |

 - The Khabarovsk Territory

- FSC certification

FTN Russia – member of Association of Environmentally Responsible Producers of Forest Products

VLTP  - Verification of Legality of Timber Products (SGS in Khabarovsk)

Levels of ecological responsibility

1. High level of ecological responsibility. Wood enterprise is a sustainable forest manager. Almost all standards of sustainable forest management are observed.

2. Middle level of ecological responsibility. Wood enterprise is comparatively sustainable forest manager. Forest management is at acceptable level. Company solves problems in order to improve forest management. Company has enough resources to follow standards of sustainable forest management and has a goal to get international forest certificate.

3. Low level of ecological responsibility. Level of ecological responsibility is rather low, but company tries to improve the situation. A lot of indicators do not conform to the level of sustainable forest management. Company is ready to improve the level of forest management and ready to take steps for it.

4. Insufficient level of ecological responsibility. Level of ecological responsibility is very low. Most of indicators do not conform to the level of sustainable forest management. System of ecological management and ecological transparency does not correspond to standards of sustainable forest management.
